

## **Stable Computers**

We are still offering phone and where possible remote support to not only our current customers but to new as well.

The biggest issue for us and I think something your web site could help us with, is getting the message across that everyone needs to be extra vigilant and extremely cautious in order to protect themselves from phishing and scamming emails along with phone calls from people offering support for issues that are not a problem!

We are suggesting that if anyone is unsure about something they can give us a call and we will be very happy to discuss the issue with them. We would like everyone to be safe both from Corona Virus and unscrupulous people that are very clever at getting you to part with your money or getting onto your computers through the back door.

We have sent out an email to all our customers that included the following, not wishing to scare anyone:-

"I would also like to highlight that there will be many new scams trying to access your computers or part you from your money.

My advice is to always be sceptical and look for anything that doesn't feel right, if you need a second opinion please give me a call."

Thank you again for your email.

Kind Regards

***Trisha***
